## DETAILED ACTION

### *Election/Restrictions*

During a telephone conversation with Sean M. McGinn on September 2, 2002 a provisional election was made without traverse to prosecute the invention of claims 1-3. Affirmation of this election must be made by applicant in replying to this Office action. Claims 4-6 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamane et al.

(U.S. Pat. No. 6,020,229).

Regarding claim 1, Yamane et al. show, in Fig. 10, a semiconductor device comprising a plurality of types of transistors (two transistors on the left and right) having different gate insulator film (203, 206) in their thickness value, said plurality of types of transistors having different thickness values of gate electrode (204, 207) in correspondence to the thickness

values of gate insulator film thereof (col. 8, lines 26-60).

Regarding claim 2, Yamane et al. show, in Fig. 10, the plurality types of transistors consists of a plurality types of MOSFETs formed on a substrate (201).

Regarding claim 3, Yamane et al. show, in Fig. 10, the MOSFETs including a core-purpose MOSFET (the transistor on the right) and an I/O purpose MOSFET (the transistor on the left); and said core-purpose MOSFET has a smaller thickness of the gate insulator film (10 nm) than said I/O purpose MOSFET (30nm) and also has a smaller thickness of the gate electrode (100nm) than said I/O purpose MOSFET (200nm) (col. 8, lines 26-60).

### *Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Junghwa M. Im whose telephone number is (703) 305-3998. The examiner can normally be reached on MON.-FRI. 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom Thomas can be reached on (703) 308-2772. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-7722 for regular communications and (703) 308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
